EFFICIENT WORKING ON INVERTER

www.ignitos.co.in

e2 Technology BLDC FAN

BLDC stands for Brush less Direct Current. The motor runs because of an interaction between a single winding and strong permanent magnets. The commutation is deployed by smart electronics. Thanks to the BLDC inverter technology and our proprietary sensor less algorithm, Ignitos fans consume just 28W at full speed.

Power consumption at each speed

The power consumption of the Ignitos Raven fan varies with the speed at which it is set. It consumes less power than an LED bulb at speed 1

	SPEED	WATTAGE (W)
● ● ● ● ●	1	3
● ● ● ● ●	2	6
● ● ● ● ●	3	9
● ● ● ● ●	4	18
● ● ● ● ●	5	28

These specifications are for the Ignitos Raven 1200 mm fan. The performance at each speed may vary for different models.

The Perfect Blend Of *Style & Savings*

A Comparison : Ignitos Fans Vs Regular Fan

 **IGNITOS** • **REGULAR FAN**

*Assumptions : usage of 16 hours/day, for 300 days a year with electricity rate of ₹7/unit
